Product Description

USB TYPE C Charging Electric Candle Warmer Lamp Luxury Fragrance Scented Candle Table Lamp

Product Description

A candle warmer is a device that allows for scent distribution throughout a space without the use of an open flame. There is generally a light and/or heat source of some kind within the device, a plug to go in an outlet or a switch to power on a battery, and an area at the top to hold wax melts. The wax melts are small quantities of pre-portioned scented wax with a low boiling temperature.
